PROFESSIONAL SUMMARY

Junior DevOps Engineer with hands-on experience in **AWS cloud infrastructure, Linux administration, CI/CD automation, Docker, Kubernetes, and infrastructure monitoring**. Experienced with AWS services including **EC2, S3, IAM, ECS, EKS, CodeCommit, and CloudFormation**, along with Jenkins, Harbor, Terraform, Ansible, Prometheus, and Grafana. Skilled in designing and maintaining CI/CD pipelines, containerizing applications, implementing **Kubernetes blue-green deployments and rollback strategies**, and replacing manual deployment workflows with automated release processes. Experienced in Linux server administration, **Sophos VPN and firewall troubleshooting**, infrastructure operations, and Bash-based database backup automation using Amazon S3.

PROFESSIONAL EXPERIENCE

Junior DevOps Engineer
Revolite Infotech Pvt. Ltd.

Jan 2026 – Present
Chennai, Tamil Nadu

- Supported cloud infrastructure, application deployments, and operational activities for web applications across **e-commerce, hiring, workforce management, and task management** domains in development, UAT, and production environments.
- Provisioned and managed AWS infrastructure using **EC2, IAM, S3, ECS, EKS, CodeCommit, and CloudFormation** for application hosting, access management, container orchestration, source control, and infrastructure provisioning.
- Administered **Linux servers and Citrix XenCenter environments**, troubleshooting networking, DNS, deployment, services, and system-level issues.
- Configured and troubleshot **Sophos VPN and firewall** connectivity, supporting secure remote access and resolving network access and connectivity issues.
- Developed and maintained **Jenkins CI/CD pipelines** to automate source checkout, application builds, Docker image creation, registry publishing, and Kubernetes deployments.
- Containerized applications using **Docker** and deployed workloads on **Kubernetes**, managing deployments, services, namespaces, configurations, releases, and application rollouts.
- Implemented monitoring using **Prometheus and Grafana** and automated Linux database backups using **Bash**, transferring backup files to **Amazon S3**.

PROJECTS

Enterprise Retail & E-Commerce Platform

- Replaced manual build-and-copy deployments with an automated CI/CD workflow using **Jenkins, AWS CodeCommit, Docker, Harbor, and Kubernetes**, improving deployment consistency and reducing manual intervention.
- Developed a Jenkins pipeline to retrieve source code, build Docker images, generate **Git commit-based image tags**, publish versioned images to Harbor, and deploy application workloads to Kubernetes.
- Implemented **Kubernetes blue-green deployment** by deploying releases to the inactive environment, validating pod readiness and rollout status, and switching application traffic after successful validation.
- Configured **automated rollback** to restore traffic to the previously deployed healthy version when deployment validation failed, improving release reliability and recovery.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, IAM, ECS, EKS, CodeCommit, CloudFormation)

Containers & Orchestration: Docker, Kubernetes, Harbor

Monitoring & Observability: Prometheus, Grafana

Scripting: Bash, Python

Operating Systems: Linux, Windows

CI/CD: Jenkins, GitHub Actions

Infrastructure as Code: Terraform, Ansible

Networking & Security: Sophos VPN, Sophos Firewall

Version Control: Git, GitHub, AWS CodeCommit

Virtualization: Citrix XenCenter

EDUCATION

Bachelor of Technology in Computer Science and Engineering
D.R. M.G.R. Educational and Research Institute, Chennai

Aug 2021 – May 2025
